WORK EXPERIENCE

EMPLOYER	Roblox	LOCATION	San Mateo, CA
JOB TITLE	Engineering Manager	PERIOD	September 2024 — Present
TEAM	Design Systems & Accessibility (↔ Luau UI Ecosystem)		

Lead the team owning Roblox’s cross-product design system (Foundation) across App, In-Experience UI, and Studio, along with critical tooling. Defined vision, roadmap, and the quality bar for component and accessibility standards. Delivered 40+ components over 2 years with 15% adoption, with additional 5% indirect adoption via component migrations. Partnered cross-functionally with design, product, and every frontend-facing team in the company to replace legacy components and ship accessible, performant, and consistent UI at scale. Conceived and orchestrated the delivery of 5+ major accessibility features with full app-wide support; acted as the strategic product lead, defining requirements and alignment across all Roblox teams while directing engineering efforts.

EMPLOYER	Roblox	LOCATION	San Mateo, CA
JOB TITLE	Senior Software Engineer & Tech Lead	PERIOD	July 2021 — September 2024
TEAM	Creator Social Design Systems & Accessibility		

Architected 5+ fundamental user journeys as the inaugural feature developer on create.roblox.com, which now serves millions of creators per day. Returned to Social to lead full-stack initiatives for Groups. Became the founding member of the Design Systems & Accessibility team; conducted the initial audit and overhaul of the legacy component library, leading to the development of a new component library and additional staffing.

EMPLOYER	Roblox	LOCATION	San Mateo, CA
JOB TITLE	Software Engineer	PERIOD	July 2018 — July 2021
TEAM	Social Avatar		

Joined as one of <10 frontend-leaning full stack engineers at a 300-person company. Lead frontend engineer for 10+ major consumer-facing surfaces on roblox.com; self-directed the UI design and prototyping for several core pages to accelerate the product lifecycle. Primarily developed in AngularJS while touching every part of the stack—including C# backend services and iOS/Android native code—to ensure 100% feature parity.

EMPLOYER	Apple	LOCATION	Cupertino, CA
JOB TITLE	Software Engineer	PERIOD	July 2016 — March 2018
TEAM	Accessibility		

Contributed to Apple’s award-winning accessibility features, such as VoiceOver, System Zoom, and general app accessibility, and created innovative new solutions to deliver the best possible experience to users with disabilities.

EMPLOYER	Google	LOCATION	Mountain View, CA
JOB TITLE	Software Engineering Intern	PERIOD	May 2015 — Aug 2015
TEAM	Accessibility		

Implemented Analytics into the Accessibility Checker Android application, modified existing checks to fit a new UI element representation, contributed additional checks to the testing framework, and wrote Robolectric tests.
